SHASTA CLOUD

A Wi-Fi Platform **designed to be built on.**

The foundation you need to build and deliver your own Managed Wi-Fi solution.

A New Standard for Managed Wi-Fi

Shasta Cloud provides a customizable Wi-Fi platform for MSPs, CSPs, and OEMs to deliver their own wireless network solutions their way. With an open, modular technology stack including hardware, software, and intelligent automation, Shasta Cloud provides the foundation to create fully customized Wi-Fi solutions.

Our Platform

Modern architecture with the muscle to match.

Modular & Open: Mix-and-match components. No vendor lock-in. Customize freely.

Zero-Touch Provisioning: Cut deployment labor with rapid, automated onboarding.

Cloud-Managed Simplicity: One dashboard to monitor, configure, and support everything.

Full API Access: Seamlessly integrate your own workflows, tools, and people.

Enterprise-Grade Performance: Built to handle carrier-class reliability and scale.

Intelligent Automation: Self-healing, self-scaling, and operationally streamlined with NoOps.

Flexible Deployment: Deploy in public, private, or hybrid cloud environments.

By simplifying deployment and streamlining setup and operations, Shasta Cloud allows providers to reduce costs and own the end-to-end customer experience with a solution built entirely on their terms.

Why Shasta Cloud
